

Greater Lehigh Valley 5th ANNUAL SCADADDLE[®] FOR RESEARCH

PLEASE JOIN SCAD Research, Inc. by sponsoring our fun run/walk to raise money for the #1 cause of heart attacks in women under age 50 – SCAD. Spontaneous Coronary Artery Dissection (SCAD) is a little known and poorly understood cause of a heart attack. It often impacts young and healthy individuals, especially women, who seem to have few traditional risk factors for heart disease.

SPONSORSHIP: Business/organization sponsors play a key role in helping raise money for research to uncover the cause(s) and best treatment options for SCAD. Money raised through SCAD Research, Inc. will help fund the most promising research. Depending on the sponsorship level, there are a variety of benefits.

Additional SCAD Facts

SCAD strikes without warning when a tear occurs within the layers of one or more arteries to the heart. This tear blocks blood flow to the heart, causing a heart attack and sometimes death. Research is needed to determine the cause and prevention of SCAD.

- #1 cause of heart attacks among women under age 50, new mothers and pregnant women.
- More than 90% of SCAD heart attacks occur in women.
- The average age of a SCAD patient is 42 years.
- Those impacted are typically otherwise healthy.
- SCAD can reoccur and can be fatal.

And we don't know why....
