

9th ANNUAL WEST COAST 5K SCADADDLE for RESEARCH

PLEASE JOIN SCAD Research, Inc. by sponsoring our 5K run/walk to raise money for the #1 cause of heart attacks in women under age 50 – SCAD. Spontaneous Coronary Artery Dissection (SCAD) is a little known and poorly understood cause of a heart attack. It often impacts young and healthy individuals, especially women, who do not have the typical risk factors for heart disease.

SPONSORSHIP: Business/organization sponsors play a key role in helping raise money for research to uncover the cause(s) and best treatment options for SCAD. Depending on sponsorship level, there are a variety of benefits.

Additional SCAD Facts

SCAD strikes without warning when a tear occurs within the layers of one or more arteries to the heart. This tear blocks blood flow to the heart, causing a heart attack and sometimes death. Research is needed to determine the cause and prevention of SCAD.

- #1 cause of heart attacks among women under age 50, new mothers and pregnant women
- More than 90% of SCAD heart attacks occur in women.
- The average age of a SCAD patient is 42 years.
- Those impacted have few traditional risk factors for heart disease.
- SCAD can reoccur and can be fatal.

And we don't know why....
